Judy Zuo

Partner

Beijing

FenXun Partners

Ms. Judy Zuo has deep technical background and rich practical experience in patent litigation in the field of communications and semiconductors, and she is particularly good at dealing with invalidation of standard essential patents (SEPs), infringement litigation and trade secret litigation.

Professional experience

Representative Legal Matters

- Represented a leading multinational technology company in a series of invalidation proceedings involving 4G standard essential patents (SEPs), one of which was selected as one of the Top 10 Patent Reexamination and Invalidation Cases of 2022 by the China National Intellectual Property Administration (CNIPA).
- Represented a leading multinational technology company in a series of patent infringement litigations relating to 5G communications technologies.
- Represented a leading multinational technology company in a series of administrative litigations concerning telecommunications technology patents. In two cases, the client successfully overturned adverse first instance judgments on appeal; the Supreme People's Court revoked both the first instance judgments and the CNIPA's invalidation decisions.
- Represented a leading multinational technology company before the Beijing Intellectual Property Court in a patent infringement litigation involving electronic payment technologies, achieving a favorable judgment for the client.
- Represented a leading multinational technology company in a series of SEP related patent infringement litigations and related patent administrative proceedings.

Patent Disputes

Languages spoken

Mandarin / English

- Represented a well-known Chinese manufacturer in filing invalidation petitions against four standard essential patents within an SEP patent pool, resulting in three patents being fully invalidated and one partially invalidated.
- Represented a leading Chinese internet company in administrative enforcement and patent invalidation proceedings involving audio coding and decoding technologies, successfully invalidating the asserted patent claims.
- Represented a leading Chinese internet company in patent infringement and invalidation proceedings relating to online game top up technologies, successfully maintaining the validity of the patent and effectively responding to infringement defenses. The case served as a key matter in settlement negotiations within a broader series of related disputes.
- Represented a well-known Chinese semiconductor manufacturer in patent invalidation and infringement litigations concerning dual mode power amplifier chips, successfully invalidating all asserted patent claims.
- Represented a well-known Chinese manufacturer as defendant in first instance retrial and second instance patent infringement litigations involving LED circuit technologies. Through in depth technical analysis, the team reversed an unfavorable position and ultimately achieved complete victories in both the retrial first instance and the appeal.
